

Om Shree

📍 Bangalore, India ✉ om22shree@gmail.com ☎ +91 8360195490 in om22shree

Passionate about Kubernetes, E2E automation, Linux and event streaming solutions. Demonstrated experience working DevOps roles in a fintech company with strict SLAs. Have a knack for developer velocity and scale. Supported and developed multiple production grade systems for low latency and high-throughput critical financial data operations.

Certifications

- **CKAD** - Certified Kubernetes Application Developer - Linux Foundation
- **GitOps Enterprise** - GitOps certification level 3 for Argo - Codefresh
- **System design** - Coding Ninjas

Education

BTech **KIIT University**, Information Technology

Sept 2020 – Sept 2024

- CGPA: 9.2/10 ([engineering semester mark-sheets](#))
- Coursework: Algorithm Design, Computer Networking, OS, DBMS and ML

Experience

FICO, Cloud Engineer Associate

Global Platform Capabilities, Event Streaming

Bangalore
July 2024 - Present

- Automated deployment and patching of multiple production-grade **StreamNative Pulsar** clusters using nested **Helm charts**, **GitHub shared workflows**, **Kustomize**, **ArgoCD** and **Istio**
- Implemented **autoscaling** for Pulsar broker and bookkeeper pods using **HPA**, **KEDA** and **prometheus** custom metrics
- **On-call support**, operations, performance optimizations and monitoring improvements for production **Apache Kafka** clusters using **ELK stack**, **Grafana**, **AWS EC2**, **route53** and **JVM tuning**

FICO, Cloud Engineer Intern

Global Platform Capabilities, AWS infrastructure

Bangalore
June 2023 – June 2024

- Developed enterprise wide **AWS** account life-cycle management automation using **Terraform**, **Boto3**, **Python3** and Jenkins
- Participated in **CSA STAR level 2** and **PCI** attestation audit - cloud infrastructure
- Responsible for enhancements, automations, maintenance and **on-call support** for enterprise-wide **Route53** records, **IAM** policies and **AWS organization** components

Projects and Hobbies

- Multiple **spot awards** throughout my tenure at FICO *akin to performance incentives*
- Daily drive Fedora linux on my personal workstation for fun
- Pulsar visualizer to provide telemetry data for all topics in a cluster built using **Streamlit**, **Python3** and **FastAPI**
