

Om Shree

📍 Bangalore, India ✉ om22shree@gmail.com ☎ +91 8360195490 in om22shree

Passionate about Kubernetes, E2E automation, Linux and event streaming solutions. Demonstrated experience working DevOps roles in a fin-tech company with strict SLAs. Have a knack for developer velocity and scale. Supported and developed multiple production grade systems for low latency and high-throughput critical financial data operations.

Certifications

- **CKAD** [🔗](#) - Certified Kubernetes Application Developer - Linux Foundation
- **GitOps Enterprise** [🔗](#) - GitOps certification level 3 for Argo - Codefresh
- **System design** [🔗](#) - HLD and LLD - Coding Ninjas

Education

BTech **KIIT University**, Information Technology

Sept 2020 – Sept 2024

- CGPA: **9.2/10** ([engineering semester mark-sheets](#) [🔗](#))
- Coursework: Algorithm Design, Computer Networking, OS, DBMS and ML

Experience

FICO [🔗](#), **Cloud Engineer 1**

Global Platform Capabilities, Event Streaming

Bangalore
July 2024 - Present

- Automated deployment and patching of multiple production-grade **StreamNative Pulsar** clusters using nested **Helm charts**, **GitHub shared workflows**, **Kustomize**, **ArgoCD** and **Istio**
- Implemented **autoscaling** for Pulsar broker and bookkeeper pods using **HPA**, **KEDA** and **prometheus** custom metrics
- **On-call support**, operations, performance optimizations and monitoring improvements for production **Apache Kafka** clusters using **ELK stack**, **Grafana**, **AWS EC2**, **route53** and **JVM tuning**
- **Promoted** to Cloud Engineer 1 from Cloud Engineer Associate in June 2025

FICO [🔗](#), **Cloud Engineer Intern**

Global Platform Capabilities, AWS infrastructure

Bangalore
June 2023 – June 2024

- Developed enterprise wide **AWS** account life-cycle management automation using **Terraform**, **Boto3**, **Python3** and Jenkins
- Participated in **CSA STAR level 2** and **PCI** attestation audit - cloud infrastructure
- Responsible for enhancements, automation, maintenance and **on-call support** for enterprise-wide **Route53** records, **IAM** policies and **AWS organization** components

Projects

- Multiple **spot awards** throughout my tenure at FICO *akin to performance incentives*
- **Batch transaction processor** [🔗](#) - provides a robust solution for processing and analyzing large volumes of batch transactions.
Technologies used - Uses **Apache Airflow** for orchestration, PostgreSQL for storage, **FastAPI** for API endpoints & **ELK** stack
Achievements - Processed over 1 million transactions in a single batch through optimized **DAGs** and **parallel task execution**
- **Kubernetes MWC for DAPR sidecar injection basis namespace specific configurations** [🔗](#) - automatically injects DAPR sidecars into applications based on environment-specific configurations and keeps a track of injected sidecars and their configuration
Technologies used - Kubernetes, **DAPR**, **Go**, Helm
- **Personal website** [🔗](#) - Built using Streamlit and python | Get to know me
