SUMMARY

Cloud Platform Engineer specializing in large-scale distributed systems and event streaming architectures. Adept at Kubernetes, AWS infrastructure automation, and high-availability system design with proven track record in production environments. Capable of scaling up teams and improving operational tempo.

EXPERIENCE

Cloud Engineer 1

FICO

July 2025 - Present, Bangalore, IN

- Developed [distributed DNS mesh architecture](#) across multiple AWS accounts and regions, utilizing Terraform to configure numerous Route 53 hosted zones and VPC connections for **cell-based architecture**.
- Provided 12/7 **on-call support** for production Pulsar, Kafka, Route53, and DAPR services; improved MTTR by **training L1 support teams** and establishing an escalation hierarchy.
- Participated in SRE and PRE incident response calls alongside staff engineers, architects and VP-level executives.

Cloud Engineer Associate

FICO

July 2024 - June 2025, Bangalore, IN

- Optimized 10+ Kafka clusters to maintain 99.99% availability, **200ms SLA**, and **500K+ TPS** delivering **\$600K+** in annual savings.
- Team scaling - led induction and **technical on-boarding for 6 senior engineers** with 10+ years of experience each.
- Automated deployment of **30+ Pulsar clusters** using ArgoCD, Helm and GitHub actions; reducing deployment time from 45+ minutes to under 3 minutes; implemented **strong Consistency and Partition Tolerance** setup.
- Implemented Istio strict mTLS and observability using OpenTelemetry, Grafana and Prometheus.
- Automated [Deployment of DAPR control plane](#) to 30+ EKS clusters with sidecar injection and configuration management.

Cloud Engineer Intern

FICO

June 2023 - June 2024, Bangalore, IN

- Strengthened infrastructure security by conducting regular assessments and applying compliance requirements in alignment with **GDPR, PCI-DSS, CSA STAR Level 2, and CCPA frameworks**.
- Integrated the Wiz security platform into the organization's existing AWS cloud infrastructure.
- Engineered Terraform modules to standardize and expedite cloud infrastructure deployment, promoting consistency and compliance across multiple AWS regions across **100+ AWS accounts**.
- Streamlined vulnerability detection by deploying continuous integration pipelines that trigger automated **Aqua container scans** using GitHub actions and shared workflows.

PROJECT

Yapper - eBPF kernel monitor

github.com/om22shree/yapper • November 2025 - Present

- Developed a Go/eBPF observability agent that maps kernel-level network and disk activity to Apache Pulsar topics and ledgers.
- Built on **Cilium's eBPF libraries** and **BPF CO-RE** to capture low-overhead metrics with 0 application instrumentation.

SKILLS

AWS, Terraform, Kubernetes, ArgoCD, GitHub Actions, Helm, ELK stack, OpenTelemetry, Istio, Kafka, Pulsar, KEDA

CERTIFICATIONS

Certified Kubernetes Application Developer

Linux Foundation • 2024

GitOps Enterprise - level 3

Codefresh • 2025

EDUCATION

Bachelor of Technology in IT

KIIT University • Bhubaneswar, India • 2024 • 9.2 CGPA

- Coursework includes DSA, DBMS, OS, Computer Architecture, Cloud computing, ML and Software design
